

Pxx means Pin XX of the socket. The 6502 and 6510 have different pinouts. Refer to datasheets for info.

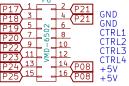

The layouts for these connectors match that of the VMD board.

No CTRL lines are connected.

6502 VMD TAP

Description

This is a 40-PIN DIP IC Breakout board with Dual 16-pin connectors wired for 6502 and 6510 CPU chips, for attaching to a VMD (Visual Memory Display) board. One or both connectors can be removed if you only need the DIP-40 breakout.

* Take care when installing so that PIN1 is aligned properly!
